

As an **IT Digitalization Specialist**, you will contribute to customer-focused digitalization projects for Italdesign Giugiaro SpA, developing bespoke digital solutions tailored to customer needs. Your responsibilities will include:

- Providing local support in Germany for in-person meetings, assisting stakeholders effectively.
- Maintaining ongoing engagement with customers and stakeholders through agile practices, fostering collaboration between German and Italian teams to ensure seamless integration.
- Managing and maintaining team documentation.

## REQUIREMENTS

- Study in engineering or a related field
- Experience with Agile and DevOps methodologies
- Strong problem-solving skills to identify and address complex issues, develop and assess various options, and implement effective solutions
- Positive attitude and strong teamwork skills
- Proficiency in German at a C1 level
- Proficiency in English at a B2 level

## Preferential requirements

- Scrum Master or Product Owner Certification

## OTHER INFORMATION

**Education:** Study in engineering or a related field

**Language skills:** Fluent knowledge of written and spoken German and English are required. Knowledge of Italian would be appreciated

**Workplace:** Gaimersheim (Ingolstadt, DE) and availability to travel

*All genders welcome*

*Just for reasons of easier readability, only the grammatical male form is used in person names.*

*This always means people of every gender identity.*

*We embrace diversity, actively encourage inclusion and create an environment that fosters each employee's individuality in the interests of the company.*
